

MAINCAL ADD UT EQUIPMENT TO UKAS SCOPE

Sonatest D70 UT Set, an example of the equipment we calibrate.

ISO/IEC 17025 scope expands again

We're pleased to announce the addition of UT equipment to our UKAS scope of approval. This enables us to issue a UKAS certificate of calibration against BS EN 12668-1:2010.

Holding UKAS since 2016, we have expanded our capabilities every year and will continue to do so. We are one of the only laboratories holding the approval for conductivity block and meters together with a full range of approvals for magnetic particle equipment.

Our latest certificate and schedule can be found at www.maincal.co.uk/certificates-pdfs/

Email sales@maincal.com to see how we can support your NDT equipment.
