

# *NDT Equipment Calibration & Repairs*

**We calibrate and repair  
NDT equipment in accordance  
with a variety of standards.**

**Equipment we routinely calibrate  
and repair include:**

- Ultrasonic flaw detectors
- Ultrasonic thickness meters
- Bond testers
- Eddy current flaw detectors
- Photometers and radiometers
- Conductivity meters and blocks
- MPI equipment
- Dye Penetrant Lines
- Radiation Monitors

## **Calibration Service**

Almost any type, make or model of NDT instrument can be calibrated at our laboratory. Calibrations are carried out in accordance with a variety of standards varying from national and international standards through manufacturer specification to customer and primary contractor generated procedures under our ISO 9001 quality system.

As part of our contract review process we are of course happy to assist with specifying both calibration and reporting requirements to satisfy the requirements of accreditation bodies such as NADCAP & UKAS.
